Marketing Operations & Revenue Intelligence Leader

I build and scale GTM systems that connect marketing spend to closed revenue. 7+ years in B2B marketing operations - most recently uncovered a \$20M pipeline gap where 97% of high-intent leads got zero follow-up; rebuilt routing and SLAs, conversion went 3% to 12%. Core work: funnel architecture, lead lifecycle design, AI-powered automation, and executive reporting tied to budget and pipeline.

CORE COMPETENCIES

GTM Systems Architecture · Revenue Operations · Funnel Architecture & Lifecycle Design · Lead Scoring & Routing · Pipeline Velocity & Attribution · ABM · Agentic Workflow Design · LLM Integration · Revenue Reporting & Executive Dashboards

EXPERIENCE

Marketing Operations & Analytics Manager | Schneider Electric | Feb 2024 - Present

Own revenue intelligence and GTM systems for 16 North American segments: funnel architecture, lead-to-revenue infrastructure, and executive reporting tied to budget decisions.

- **Pipeline Recovery:** Identified \$20M in leakage from a 97% lead-follow-up gap. Redesigned lead routing, scoring logic, and SLA architecture in Salesforce - conversion from 3% to 12% in six months.
- **Executive Reporting:** Designed Tableau dashboards powered by Tealium CDP, SFMC, and GA4 to surface pipeline velocity, funnel health, and attribution; owns MBR and QBR reporting for 80+ stakeholders across North America.
- **Funnel Architecture:** Designed NA's first end-to-end funnel framework across 16 segments - lifecycle stage definitions, lead scoring models, and conversion benchmarks now informing \$12M in annual budget reallocation.
- **AI-Powered Ops:** Architected self-serve reporting system using Copilot Studio and Power Automate; built SQL queries in SFMC Query Studio giving marketers direct access to contact database health and engagement metrics, eliminating manual requests.
- **Cross-Geography Leadership:** Manages 8-person offshore operations team across India (3) and the Philippines (5), overseeing campaign operations, reporting cadence, and MOps execution across time zones.
- **Agentic Signal-to-Action:** Built agentic pipeline intelligence system translating intent signals into prioritized daily lead recommendations for sales; generated 150 MQLs from a segment previously written off as disengaged.

Strategic Marketing Manager – GTM & Demand Generation | Schneider Electric | Sep 2021 – Jan 2024

Led GTM strategy and demand generation for enterprise automation solutions - Cobot and Machine Twin – targeting industrial manufacturing accounts globally.

- **ABM:** Built ABM program targeting 20+ enterprise accounts with persona-specific messaging across Plant Managers, Engineers, and C-suite; generated \$5M in qualified pipeline, 5% of enterprise total.
- **GTM Launches:** Led 3 product launches end-to-end: positioning, sales enablement, and integrated campaigns. Drove 35% engagement increase and 22% MQL-to-SQL improvement.
- **Sales Enablement:** Developed battlecards, ROI calculators, and white papers that gave field sales the tools to navigate complex enterprise buying committees - shortening deal cycles from 8.5 to 7.2 months.

Program Manager | CATKing Educare, Mumbai | Jul 2017 – Nov 2019

- **Demand Generation:** Built demand gen engine from scratch; \$120K revenue, 25% YoY lead growth.

AI PROJECTS

- **GTM Canvas:** Built a full-stack GTM workspace (React, Claude API, Supabase, Google OAuth) with 8 AI modules covering ICP design, competitive intelligence, campaign architecture, and funnel design. API calls routed server-side via Supabase edge functions. Production architecture, not a prototype.
- **AI Marketing Brief Agent:** Autonomous daily AI news pipeline (Python, Claude API, GitHub Actions). Zero manual steps post-launch. Runs at \$1/month. Proves agentic workflow design as production infrastructure, not demos.
- **GA4 Flashcard Agent:** Interactive GA4 certification study tool (HTML/JS, GitHub Pages). AI-generated Q&A cards covering measurement concepts, events, and reporting. Zero backend, zero cost.
- **Cadence — AI Speaking Coach:** AI-powered speaking coach (React/Lovable, Claude API). Two-pass feedback engine scoring pace, filler words, and structure. Deployed to production with GA4 tracking. Built solo, no engineering support.
- **AI SDR Prompt Library:** Built a modular prompt system for SDR outreach, objection handling, and follow-up sequencing - adopted by Sales Leadership to standardize personalization across ICPs and verticals.

LEADERSHIP

- **Demand Jam:** Built and ran a cross-functional MarTech enablement program - 100+ weekly attendees, 150+ marketers trained on SFMC, lifecycle management and AI tools; driving 40% MarTech adoption increase across North America Marketing org.
- **NAM AI Champion | Schneider Electric:** Selected as North America AI Champion; partnering with cross-functional teams to identify, develop, and scale AI automation use cases across the marketing organization.

EDUCATION: MBA, Bentley University, Massachusetts, USA · B.E., Information Technology, University of Mumbai

CERTIFICATIONS: PMP® · CSM® · GA4 Analytics · HubSpot Marketing Hub · HubSpot Revenue Operations

TECHNICAL SKILLS

Platforms: Salesforce, SFMC, Demandbase, GA4, Tealium CDP, HubSpot, Marketo, 6sense, Optimizely

AI & Automation: Copilot Studio, Power Automate, Workato, Clay, Anthropic API, GitHub Actions, Supabase

Data: SQL (SFMC Query Studio), Salesforce Reports & Dashboards, GA4 Explorations, Tableau, Looker Studio
